

EVIDENCE

§11.4.153 Real-use Video Evidence — Wave 6 (20260616-175612)

Non-committing parallel stream. Real prompt → real DeepSeek LLM via default in-process direct CLI path (NOT -use-verifier) → real result. Window-scoped (terminal pane = CLI surface under test, §11.4.154). Filename prefix helix_translate- (§11.4.155). §11.4.107 liveness: each clip ffmpeg-verified (non-zero duration + advancing frames) AND frame-extracted + content-READ (English input frame ≠ translated output frame; no frozen/error/empty output).

Provider: deepseek (DEEPSEEK_API_KEY set, never printed). All clips 790×560 yuv420p.

5 NET-NEW DISTINCT features CONFIRMED this wave

#	Feature	Video	ffmpeg	Output read (real translation)
1	HTML→HTML round-trip (EN→ES)	helix_translate-html_html_roundtrip-wave6-20260616-175612.mp4	8.0s / 240 frames	Spanish HTML: "la farola guiaba a los barcos a través de la noche neblinosa. Su haz iluminaba las oscuras olas cada pocos segundos." (valid output)
2	PDF input accepted (EN→ES)	helix_translate-pdf_input-wave6-20260616-175612.mp4	4.37s / 131 frames	from "PDF document, version 1.7": "El bosque se hizo silencioso a la caída del

#	Feature	Video	ffprobe	Output read (real translation)
3	DOCX input accepted (EN→ES)	helix_translate-docx_input-wave6-20260616-175612.mp4	8.03s / 241 frames	sol. Los pinos altos susurraban mientras el frío viento se deslizaba entre sus ramas." from "Microsoft Word 2007+": "El Puerto / Los barcos de pesca regresaron al puerto al atardecer. Gaviotas volaban sobre las redes llenas de peces plateados." Chinese: "一列列车在黎明时分穿越广阔的平原。农民们从金黄的田野中挥手道别，目送列车驶向远方的城市。" Russian: "Библиотека стояла тихо под дождем. Старые книги занимали деревянные полки, храня века забытых историй."
4	Language pair EN→ZH (Chinese)	helix_translate-en_zh_translate-wave6-20260616-175612.mp4	4.3s / 129 frames	
5	Language pair EN→RU (Russian)	helix_translate-en_ru_translate-wave6-20260616-175612.mp4	4.2s / 126 frames

Real bug findings (drafted, NOT confirmed-as-working)

MINOR-W6-1: HTML/EPUB chapter-title duplication on conversion output

- **Where:** unified-translator HTML output (and likely EPUB output) — bookToString emits the chapter Title then sections that ALSO begin with the title, producing a duplicated title line in output (visible in HTML clip: "La FarolaLa Farola").
- **Severity:** cosmetic (Bug). Core translation correct; only the title line repeats.
- **Repro:** unified-translator -i in.html -o out.html -source-lang en -target-lang es -provider deepseek → output has

La Farola

La FarolaLa Farola

(title once as heading, again concatenated into first section).

- **Status:** PENDING_FORENSICS (root cause = bookToString concatenating Title into Section.Content for single-section chapters; needs §11.4.102 systematic-debug). NOT blocking the 5 confirmed features — the translated text itself is correct & complete.

Honest non-confirmations this wave

- REST POST /api/v1/translate/batch was NOT recorded: the REST createTranslator path routes through the LLMsVerifier bridge (bridge.Open), which requires runtime model verification; the task notes localhost:8080 is unreachable and prioritised the reliable default direct path. Deferred to a future wave with the live-server bridge.
