

EVIDENCE

§11.4.153 Real-Use Video Confirmation — Wave 8

Revision: 1 Last modified: 2026-06-16T18:22:00Z

Run-id: video_wave8_20260616_182203. Binary: build/unified-translator (go build -o build/unified-translator ./cmd/unified-translator, exit 0, 2026-06-16). Path: real input → real LLM (default in-process API path, NOT -use-verifier) → real output. Recordings: window-scoped (ascinema --window-size 100x30, §11.4.154), helix_translate- prefixed (§11.4.155), wave8-suffixed (no collision with prior 48 helix_translate-* recordings; none deleted). §11.4.107: source frame ≠ output frame verified (first frame = source only + in-progress; last frame = real translated output). Each video ffmpeg-verified advancing frames.

Features confirmed (5)

#	Feature	Provider	Model	Source→Target	Real output (read from last video frame)	Video (mp4)
1	GROQ provider path (distinct from deepseek)	groq	llama-3.3-70b-versatile	EN→ES	"La vieja farola se erguía sola sobre el acantilado rocoso. Cada noche su haz barría el mar oscuro, guiando a las naves perdidas	helix_translate-groq-wave8-20260616_1 (115 frames, 3.83s)

#	Feature	Provider	Model	Source→Target	Real output (read from last video frame)	Video (mp4)
2	EN→KO (Korean / Hangul) new pair	deepseek	deepseek-chat	EN→KO	de vuelta a puerto." "새벽에 용이 잠든 숨겨진 성을 찾기 위해 용감한 기사가 고대 숲을 가로질렀다."	helix_translate-en-k-wave8-20260616_1 (106 frames, 3.53s)
3	DE→EN reverse direction (non-EN source)	deepseek	deepseek-chat	DE→EN	"The scientist worked all night in his lab. In the morning, he finally discovered the solution to the problem."	helix_translate-de-e-wave8-20260616_1 (114 frames, 3.80s)
4	FR→ES (non-English[?]non-English)	deepseek	deepseek-chat	FR→ES	"El anciano marinero contaba historias de tormentas y tesoros ocultos en el fondo del mar."	helix_translate-fr-es-wave8-20260616_1 (107 frames, 3.57s)
5	EN→SR Latin script (distinct from RU→SR Cyrillic)	deepseek	deepseek-chat	EN→SR (-script latin)	"U srcu planina živela je mudra stara žena koja je znala tajne svake lekovite	helix_translate-en-s-wave8-20260616_1 (109 frames, 3.63s)

#	Feature	Provider	Model	Source→Target	Real output (read from last video frame)	Video (mp4)
					biljke." (all-Latin, no Cyrillic)	

Recordings live at /Volumes/T7/Downloads/Recordings/ (raw, gitignored).
Frame stills committed here as durable in-repo evidence (§11.4.83):
groq_en_es_first.png (source-only, LLM in-flight), groq_en_es_last.png,
en_ko_last.png, de_en_last.png, fr_es_last.png, en_sr_latin_last.png.

§11.4.6 finding (not a bug)

unified-translator -h provider help text lists only openai, anthropic, zhipu, deepseek, qwen, gemini — GROQ is omitted from the help string, BUT groq IS fully wired (pkg/translator/llm/groq.go, factory llm.go:276–277, env-var map main.go:444, whitelist llm.go:69) and works end-to-end (feature #1 confirmed). The stale -h string is a minor doc-accuracy nit, NOT a functional defect. Valid Groq models (whitelist): llama-3.1-70b-versatile, llama-3.1-8b-instant, mixtral-8x7b-32768, llama-3.3-70b-versatile, gemma2-9b-it.

NO-bluff attestation

All 5 verdicts rest on a real video whose last frame shows a "Translation completed successfully" line with the real provider AND real target-language output text distinct from the source. No frozen frame, no LLM error, no empty output, no mocked response.
