

# EVIDENCE

## helix\_translate WAVE9 §11.4.153 real-use video evidence — 20260616\_184823

NON-COMMITTING parallel stream (wave9). Real input -> real DeepSeek/novita (in-process bridge, LLMSVERIFIER\_API\_URL unset) -> real output. §11.4.107 + §11.4.154 + §11.4.155.

### Features CONFIRMED (3)

#### 1. REST POST /api/v1/translate/batch (server-w9 :8091 TLS, in-process bridge)

- Real multi-text translate. 3 EN -> SR: "The river flows to the sea." -> "Peka teče do mora."; "Books open windows to the world." -> "Knjige otvaraju prozore u svet."; "Time heals all wounds." -> "Vrijeme leči sve rane." 0 errors. provider resolved: llm-novita.
- Video: /Volumes/T7/Downloads/Recordings/helix\_translate-rest-batch-version-wave9-20260616\_184823.mp4 (frames 790, 7.52s, early!=late)

#### 2. REST GET /api/v1/version (server-w9 :8091)

- Real substantive data: codebase\_version 2.3.0, git\_commit c2aa7c841c90df2ac1519c147f61bb82a9614963, go\_version go1.26.2, build\_time, components map. NOT a bare status.
- Video: same clip as #1 (helix\_translate-rest-batch-version-wave9-20260616\_184823.mp4)

#### 3. preparation -> translate two-stage pipeline (preptrans-w9, in-process bridge)

- Source: The Lighthouse Keeper (EN) -> Spanish. Stage1 real DeepSeek analysis: content\_type "short story", genre "literary fiction", 2 characters (Captain Marlowe + speech pattern, Eli), 3 untranslatable terms (Stormcrag Point, Captain Marlowe, Eli), 5 key themes, 1974 tokens. Stage2: analysis informs translation — output EPUB preserved exactly those 3 untranslatable names in the Spanish text ("capitán Marlowe", "Stormcrag Point", "Eli"). Output 3452B EPUB + 13495B analysis.json.

- Real Spanish output sample: "La luz en la tempestad ... El viejo capitán Marlowe había sido farero de Stormcrag Point durante cuarenta años..."
- Video: /Volumes/T7/Downloads/Recordings/helix\_translate-prep-translate-two-stage-wave9-20260616\_184823.mp4 (frames 790, 10.68s, early!=late)

## **NOT confirmable / findings**

- pkg/api/server.go Server (/api/translate, /api/batch, /api/languages): NO cmd entry instantiates api.NewServer — unwired alt server, no runnable binary. Not confirmed (did NOT fabricate a runner, §11.4.124/§11.4.6).
- /api/v1/providers: static hardcoded list (openai/anthropic/zhipu/deepseek), NOT real upstream data — per W9 item 5 criterion ("substantive real data, not a bare status") NOT confirmed as substantive.

## **Frames (early!=late, not frozen §11.4.107)**

- prep\_early 52873d28 != prep\_late b89b22df
- rest\_early 85cbba74 != rest\_late f4127073
- OCR dumps: ocr\_rest\_late.txt, ocr\_prep\_late.txt
