Revision: 76 Last modified: 2026-06-15T18:05:00Z

✅ GAP-CLOSURE BATCH (2026-06-15, video/ coverage-surfaced gaps — all reviewed GO + pushed)

Three gap-closures (each RED-first §11.4.115, mutation-verified, independent batch review VERDICT GO §11.4.142) landed + pushed: - **Parent d53e085** (pushed all remotes): (1) **cmd/cli title path-leak FIXED** — TXT parser set `Metadata.Title=filepath` → translated → leaked into output EPUB `<dc:title>`; `sanitizeBookTitle()` added at the cmd/cli input→book seam (genuine titles pass through; real run `<dc:title>Tiha bašta</dc:title>`, NO LEAK). (2) **pkg/verification multipass engine WIRED** (§11.4.124 — git-history proved it was NEVER imported by any cmd/, born dormant 717bf18, finished real code not scaffolding) via opt-in `-multipass` flag (default OFF, back-compat; guardrails: `passes≥1`, base preserved on error/empty); RED→GREEN httptest + real DeepSeek “Step 4: Multi-pass Polishing ✅”; §11.4.150 research docs/research/20260615_video_surfaced_fixes/verification_multipass_wiring.md. - **llm_provider 724e284** (pushed LLMProvider remote; parent gitlink bumped in d53e085): contract test for the interface-only pkg/provider (zero-coverage §11.4.28 gap; mutation-proven; suite green).

NEXT (open gaps, tracked — none blocking the current scope): implement DOCX/PDF **output** writers in pkg/ebook (input-only today); implement cmd/translator local path (STUB “not yet implemented”); fix cmd/cli silent-fail-exit-0 when `-model` omitted (incidental finding); record a `-multipass` video for §11.4.153 ledger confirmation (currently real-run+RED→GREEN evidenced, no .mp4 yet); gofmt the 23 pre-existing flagged files in `llm_provider`; web-dashboard translation video is **OPERATOR-BLOCKED** (HelixQA-gated, separate session). `translate-ssh/ebook-translator` stay OPERATOR-BLOCKED (need remote SSH/llama.cpp host).

📺 §11.4.153 FEATURE-STATUS VIDEO- CONFIRMATION SYNC (2026-06-15, ~25 real videos → ledger honest)

The §11.4.153 per-feature Status ledger is now in honest sync with the real video evidence captured this session (docs uncommitted — conductor to commit; do NOT `git add -A`).

What landed before this sync (already pushed): - §11.4.153 doc set (docs/features/Status.md + Status_Summary.md, 470/472 features, four-format HTML+PDF+DOCX) shipped in 58178a5; constitution bump 74e7fbe. - **3 video-surfaced bugs FIXED + pushed** in a5e8866 (the green suite had missed all 3, §11.4.4/§11.4.138): (1) preparation-translator DEAD — DeepSeek API key never reached config (-api-key/env not wired) → “DeepSeek API key is required”, no analysis JSON; (2) cmd/server TLS startup — config with no tls_cert_file failed to start; fix backfills self-signed certs in LoadConfig; (3) REST POST /api/v1/translate ignored target_lang (hardcoded) → always Serbian regardless of requested language. - ~25 real videos captured under /Volumes/T7/Downloads/Recordings/helixtranslate-*.mp4 (all ffprobe-verified dur>0+frames>0; key ones content-verified frame-by-frame this session). - **All 9 owned submodules GREEN** — coverage logs qa-results/submodule_coverage_20260615/. - **README §11.4.57** Tracked-Items doc-link section added (prior session).

This sync (Status.md/Status_Summary.md Rev 1→2 + exports re-synced): - **Video-confirmed: 1 → 20** feature rows (≈4.3% of 472), each flipped to Confirmed: ONLY after the cited .mp4 was content-verified (§11.4.6 no overclaim). Confirmed: unified-translator (DeepSeek translate; EPUB→TXT / HTML→EPUB / FB2→EPUB / FB2→FB2; Serbian-Cyrillic; -script Cyrillic↔Latin; format-detection; help/version; -verify), REST API (POST /api/v1/translate real DeepSeek + target_lang FIXED, TLS startup FIXED, /health/version-/providers), gRPC (real EN→ES), markdown-translator (EPUB↔MD round-trip), preparation-translator (FIXED), cmd/cli (real DeepSeek), monitor-server (live WS hub), DeepSeek library client. - **Honest gaps recorded (§11.4.6, NOT confirmed):** DOCX output + PDF output UNIMPLEMENTED (no writer in pkg/ebook; unified-translator rejects them; 2 new gap rows added → 472 total); -verify ≠ pkg/verification multipass engine (engine has no CLI entry point wired in); cmd/translator local path = STUB (“local translation not yet implemented”); cmd/translate-ssh + cmd/ebook-translator = OPERATOR-BLOCKED (need remote SSH/llama.cpp worker host); GET /api/v1/verified-models = 404 (LLMsVerifier disabled in config); cmd/cli minor cosmetic file-path-leak into title metadata. - **Exports + fingerprint re-synced** via docs_chain sync features (applied: 6 derived nodes — HTML/PDF/DOCX × 2 docs) → docs_chain verify features = **in-sync** (RC=0); evidence qa-results/docs_chain/20260615T144104Z/sync.log; docs_chain state.json = §11.4.86 content-hash fingerprint store.

NEXT (open gaps queued): implement DOCX/PDF output writers in pkg/ebook; wire pkg/verification multipass engine into a CLI entry point; implement cmd/translator local path; produce videos for remaining PENDING runtime features (web dashboard translation, other providers) to lift coverage. translate-ssh/ebook-translator stay OPERATOR-BLOCKED until a remote SSH/llama.cpp host is provided.

WAVE 15 — SECOND-PASS + determinism (campaign 101→110; second pass STILL productive)

Parent HEAD 6c89910, build/vet/test green, git OK, llms_verifier pointer intact. - **pkg/ebook** 6c11dee (#102): EPUB parser set chapter.Title to the zip entry name → EPUB→translate→EPUB rendered “OEBPS/chapter1.xhtml” as every chapter heading + TOC entry (core use case). Fix = extractChapterTitle (
